DALI-2 Touch Panel (Push Button)

(Note 1) (U type only)

Indoor Household Building Automation

■ Features

- DALI-2 certified touch panel
- Compliant with IEC-62386-301 push button
- Compliant with IEC-62386-332 feedback
- Compatible for DALI-2 controllers
- Powered by DALI Bus
- Configurable functionality via MEAN WELL DLC-02 software
- Each button can trigger multiple modes:
  Short Click/Double Click/Long Press, to trigger scene or grouping functions
- Backlight brightness adjustable
- Touch panel volume adjustable
- 5 years warranty

■ Applications

- Office lighting
- Commercial lighting
- Warehouse lighting
- Home automation
- Luxury villa lighting

■ Description

The DTP-2XX series compliant with DALI IEC62386 standard as a DALI-2 input device, it is powered by the DALI bus and has a variety of buttons. It designs with a tempered glass and a sliding cover. The cover is easy to install and can also provide customized laser-engraved symbols. There is a built-in toggle switch to adjust the button backlight and volume, allowing users to customize settings according to their needs. This touch panel can be used with the MEAN WELL DLC-02 DALI controller, LED power supply, and various DALI sensors to form a DALI-2 digital lighting system, which can control the on/off, color temperature, color, brightness, scene, grouping, scheduling, and various event adjustments, thus meeting most lighting control needs. If you need a DALI digital lighting solution, please contact MEAN WELL sales representative.

■ Powered by DALI Bus Wiring Diagram

Note: For detail wiring diagram as below.

■ DALI Digital Lighting Application Wiring Diagram (MEAN WELL DLC-02 built-in with DALI power)

MEAN WELL DLC-02 controller, each channel can be connected up to 12 input devices but the maximum number of input devices that can be connected is determined by the connected DALI bus power and operating current of the input device. For example, when 64(Lamp) LED drivers (2mA) are connected, the maximum remaining applicable current on the DALI bus is 250mA-(2mA x 64) = 122mA. If the current requirement of the input device is 10mA, then up to 12 input devices can be connected, DLC-02 manual, please refer https://www.meanwell.com/Upload/PDF/DLC-02-E.pdf

■ Customized Button Symbol (Optional)

Customers can customize button symbols according to actual needs. Please refer the symbols below or provide your own symbols, then our factory can produce by laser engraving. Please contact sales for detailed customization procedures.
